ednet Hardcopy

Print with passion –

- compatible
- environmentally friendly
- recycled

Quality Promise

Our **compatible** and **remanufactured** ink cartridges and laser toners are all manufactured in Europe under one roof and are compatible with the newest and most popular printer models. Production is carried out according to the latest **DIN Norms**, guaranteeing the highest quality and excellent **print results**. Every remanufactured cartridge is print-tested before leaving our factory. Furthermore, we offer a **3 year guarantee on laser toner and 2 years for inkjet cartridges**.

The extensive **ednet** range offers inkjet and toner cartridges of **Brother, Canon, Epson, Hewlett Packard** and **Lexmark**. Quick development and smooth production guarantees a consistent range of the latest products.

The use of ednet products does not affect the guarantee of the printer or existing maintenance agreements with the printer manufacturer.

Inkjet Packaging

Color and number code

Our color and number references the different colors of the individual OEM's. The OEM part number is displayed on every ednet product.

	Color-Code Brother
	Color-Code Canon
	Color-Code Epson
	Color-Code Hewlett Packard
	Color-Code Lexmark

DIN Norm for Printer Cartridges

DIN 33871

DIN 33871 applies to **remanufactured inkjet cartridges**. It determines the foundations for the remanufacturing and the inspection of essential application properties, for example, quality of **color reproduction** and **productivity**. The aim of the norm is to guarantee a **consistent print quality** through the use of remanufactured printer consumables. The **DIN 33871** remanufactured products are **cost-effective alternatives** for the original cartridge. This also presents the repeat use of resources.

Remanufactured inkjet cartridges

> Remanufactured inkjet cartridges produced according to DIN 33871

Compatible inkjet cartridges

> 100% remanufactured from scratch
> 100% free from patent infringements

Multipacks

> Multiple ink cartridges from a printer in one set
> Large saving potential for the user

Package

Recyclable Package

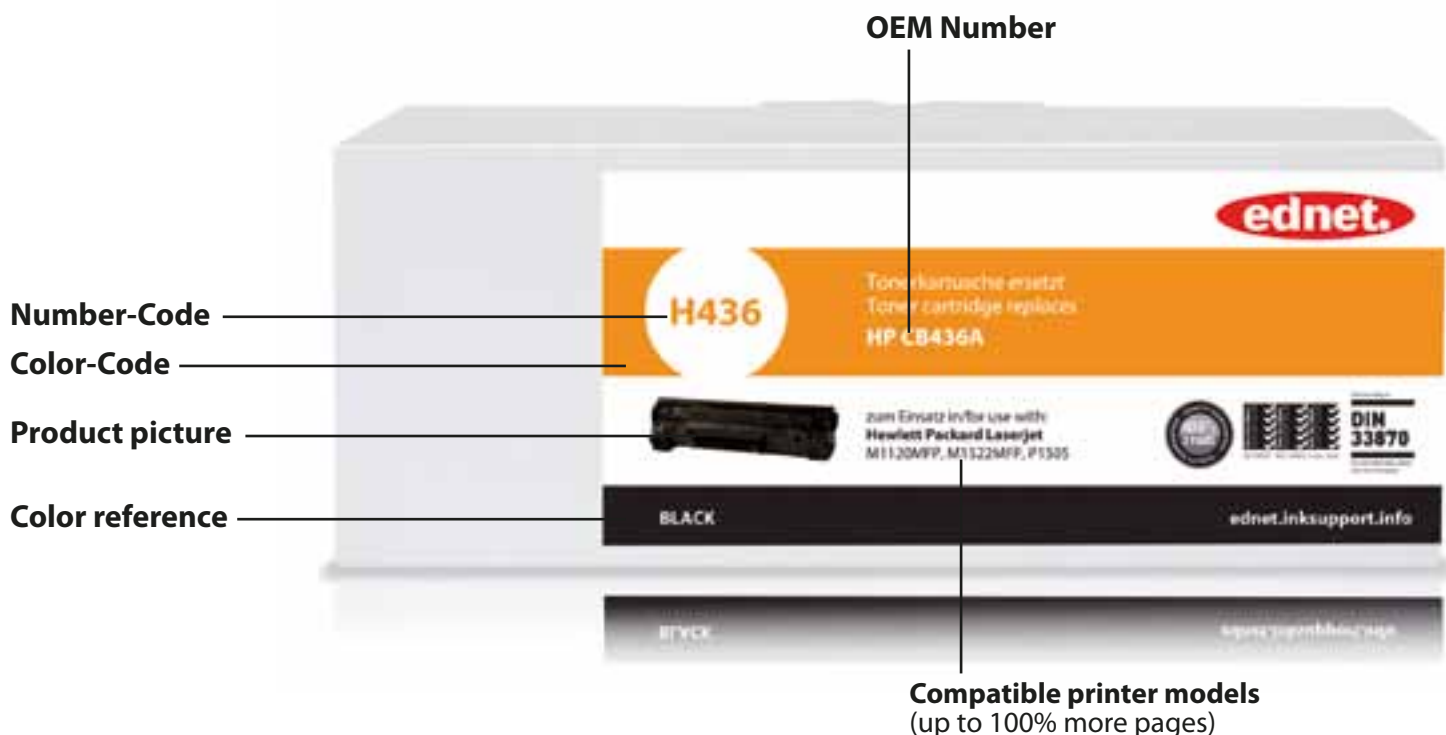

Our aim is to **reduce waste**. Therefore, our blister packaging consists of up to 80% **recycled material**. By printing information directly onto the cartridge, we reduce the need for leaflets, and therefore, **packaging waste**. Furthermore, our insert cards are made from recycled paper. The depth of our packaging was modified according to the cartridge size to further optimise exciting packaging waste. All of our toner packaging is made up of recycled materials and **our wastepaper is completely recycled**.

More ink, less waste

Our recycling process guarantees that every cartridge is remanufactured to be filled with the **highest possible ink dosage**. In many cases, it is possible for us to fill our remanufactured cartridges with more ink than the equivalent original. Therefore, the end user as well as the environment profits from this: The cartridge is not only recycled, but also prints longer than the standart original. You will find this quality reference on our packaging, e.g. „**90% more pages than the original cartridge**“.

Packaging Toner

DIN 33870

DIN 33870 determines that each product, whose production meets the criteria, must have a corresponding material safety data sheet. According to **EU-Guideline 91/155/EWG**, safety data sheets provide important information regarding environmental and health responsibility. The criteria included, which are mentioned in this flyer, are determined by the **EU-Guideline**. All toner cartridges in our factory are produced according to the latest **DIN 33870** guidelines.

This means specifically:

- > Complete disassembly of the empty toner cartridge
- > Cleaning of the individual parts, such as the drum, rollers, etc.
- > Exchange of any worn parts
- > Refilling the cartridge with high quality ednet toner powder

All ednet laser toners are remanufactured to achieve or exceed the **quality**, performance and **page yield** of the original product. We use only the highest quality empties and insert the **highest quality toner powder**. Critical components are generally replaced. Additionally, every toner cartridge is print tested before shipping.

We offer products for printers for **Brother, Canon, Hewlett Packard, Kyocera, Samsung** and **Oki**.

Certificates

- **ISO 9001** Quality management systems
- **ISO 14001** Environmental management systems
- **OHSAS 18001** Occupational health and safety management systems
- **FSC** FSC is an international, non-governmental organisation dedicated to promoting responsible management of the world's forest
- **BRC** The BRC Global Standards are leading global product safety and quality certification program used by certificated suppliers in over 100 countries
- **LGA** Our products have been certified by the independent German testing agency, the LGA, for performance quality and page yield
- **Nordic Swan** The Nordic Swan certificate is an ecolabelling scheme that evaluates a laser product's impact on the environment throughout the whole lifecycle
- **Blauer Engel** The Blue Angel is a German certification for products and services that have environmentally friendly aspects.
- **Ethical Trading Initiative Base Code**
