Nr.: DN-95431
EAN: 4016032483571

Socket strip with aluminum profile, 7 safety sockets, 2m cable with surge protection
1U Aluminum PDU, rackmountable, 7x Safety outlet 16A, 230VAC, 50/60Hz, Overvoltage protection

- Perfect current distribution for your network and IT rack.
- Integrated surge protection protects connected users from overvoltage.
- Jacks are rotated by up to 35°, which offers optimal space management and easy access

EV charger for household socket
EV charger, 5m, 230 V, Type F 7/4 to EV Type 2 Adjustable charging power: 1.8/2.3/2.8/3.7kW

- The portable EV charger is suitable for charging at home as well as on the go, if no wallbox or charging station is available - An in-cable control box (ICCB) is also designated as an emergency charging cable
- Compatible with electric vehicles (EV) and plug-in hybrid vehicles (PHEV) that have a CCS or Type 2 charging connection and can be charged with alternating current
- The charger complies with protection class IP55 and is suitable for indoor and outdoor areas - Including supply line, the connection cable with type 2 plug (IEC 62196-2) has a length of 5m

Wall Box 3-phase 11kW with 5m Type2 charging cable
Wall-Box 3-Phase 11kW with 5m standard Charger cable

- With the wall charging station, DIGITUS offers a stationary charging solution for private households and companies that want to charge their electric cars on site (parking lot, parking space, garage, carport...)
- The charger is designed for a three-phase power connection with an input voltage of 400 V and supports charging operations up to 11kW with 16A (installation by qualified electrician required)
- Compatible with electric vehicles (EV) and plug-in hybrids (PHEV) that have a CCS or Type 2 charging connection and can be charged with alternating current

EV charging cable, type 2 to type 2
EV charging - Single Phase, 230V, 32A, Type 2 to Type 2 Standard Charger cable, different lengths

- The EV charging cable from DIGITUS is compatible with all electric vehicles (EV) and plug-in hybrid vehicles (PHEV) that have a CCS or Type 2 charging connection and can be charged with alternating current
- Single-phase charging cables for max. 7.4kW/32A are generally used for charging a hybrid vehicle at home – Short cables are ideal if charging is always carried out at the same charging point and the length is sufficient
- For charging outdoors, the charging cable complies with protection class IP55 (water jet-proof), which means that a secure connection is possible between charging station and charging socket (charging inlet)
- Lengths: 5m, 7.5m
