

DIGITUS® Injetor PoE Gigabit Ethernet, 802.3af, 15,4 W

DN-95102-1

EAN 4016032441120

Injetor PoE Gigabit Ethernet, 802.3af Pinos de alimentação:4/5(+),7/8(-), 15,4W

Com a ajuda do injetor PoE da Digitus, pode minimizar o esforço de cablagem ao instalar dispositivos com capacidade PoE, como câmaras de rede IP. A alimentação de dados e de energia dos aparelhos é efectuada apenas através de um cabo Ethernet. Isto elimina a necessidade de instalar um cabo de alimentação separado e permite-lhe expandir a sua rede mesmo onde não existam tomadas ou cabos de alimentação. O injetor é totalmente compatível com a norma IEEE 802.3af PoE e fornece uma potência de saída de 15,4 watts.

Minimize o esforço de cablagem para APs sem fios, telefones IP ou qualquer outro dispositivo com capacidade PoE!

- Em conformidade com a norma 802.3af PoE
- Tensão de saída de 48 volts, 15,4 watts
- Entrada LAN RJ45
- Saída LAN (RJ45), alimentação eléctrica através dos pinos: 4/5(+), 7/8(-)
- Ligação por cabo: 10/100/1000 Mbps

- A saída tem um limitador de corrente, protecção contra curto-circuitos e deteção e classificação automáticas do dispositivo terminal
- Auto-consumo: 1,6 W máx.
- Fonte de alimentação:100-240V AC 0.5A 50/60Hz
- Temperatura de funcionamento: -5°C - 45°C
- Dimensões (mm): 134(C) x 56(L) x 33(A)
- Consumo de energia do dispositivo (máx.): 0,285 W

Attributes

- PoE Power budget: 15.4 W
- PoE standard: IEEE802.3af (PoE)
- Ethernet speed: Gigabit
- Industrial usage: no

Package contents

- Injetor PoE
- Guia de início rápido
- Cabo de alimentação

Safety notes

- This product is intended for indoor use only.
- Read all instructions and follow all warnings and instructions on the device.
- Do not place this appliance on an unstable surface (such as a trolley, stand, table, etc.).
- Do not use this appliance near water.
- Do not place this appliance near or above a radiator.
- The housing is equipped with openings for heat dissipation and ventilation. To prevent overheating during operation, the ventilation openings must not be blocked or covered.
- Do not place the appliance on a soft surface (e.g. bed, sofa, blanket, etc.). This will block the ventilation.
- The appliance must not be installed in a closed environment if adequate ventilation is not guaranteed.
- Do not spray any liquids onto the appliance.
- Disconnect the mains plug before cleaning. Do not use any liquid or foam cleaners.
- Clean the appliance with a damp cloth.
- Connect the device according to the power supply on the rating plate.
- To prevent damage to the appliance, it is important that all appliances are properly earthed.
- Do not place any objects on the power cable and lay it in such a way as to avoid tripping hazards.
- Use a surge protector, a regulator or an uninterruptible power supply (UPS) to protect your system from sudden, temporary and reduced power.
- Secure the system cable and mains cable properly and ensure that no objects are pressing on the cable.
- Do not insert any objects into the appliance through the openings in the housing. There is a risk of a short circuit, which can lead to fire or electric shock.
- Do not attempt to repair the appliance yourself. Always contact an authorized customer service centre.
- If any of the following conditions occur, unplug the appliance and return it to an authorized service centre for repair
 - The mains cable, power supply unit or plug for the power supply is damaged or worn;
 - Liquid has penetrated the appliance;
 - The device has been exposed to rain or water;
 - The device has been dropped or the housing has been damaged;
 - The function of the device has obviously changed;
- The appliance cannot be operated as described in the operating instructions.
