

DIGITUS USB 2.0 sharing switch

DA-70135-2
EAN 4016032451938

USB 2.0 Sharing Switch 2 PCs - 1 device, Button Control, self-powered

These sharing switches are ideal for multiple PCs to share one USB device. The USB 2.0 sharing Switch has designed a user-friendly interface that makes device sharing easier. No more extra complex driver download procedures are necessary. Only a few clicks and you can start to explore the USB adventures. USB connections can be found in various devices, from PC cameras to scanners, printers, Hubs, and KVM switches, As USB technology continues its reign in the computer peripheral market, USB 2.0 Sharing Switches offer a

completely cost-effective solution for the small business and home user to manage their network layout.

No more plugging and unplugging between your computers and USB devices - The USB Sharing Switch allows to share a single USB device (like printers, scanners) between two computers

- Kompatibilní s rozhraním USB 1.1 a USB 2.0
- Odpovídá standardům USB 2.0

**Safety notes**

- Overloading can lead to overheating and damage to the appliance or the connected peripherals.
- If necessary, use an external power supply to ensure stable performance.
- If devices such as external hard disks or printers that require a high power consumption are connected, the device should be used with an external power supply. Otherwise, the device could be overloaded or functional problems could occur.
- Do not expose the device to rain, moisture, vapors or liquids.
- Do not insert any objects into the device.
- Do not attempt to repair the unit or open the housing without authorization. You risk an electric shock!
- Ensure adequate ventilation to prevent damage due to overheating.
- Dust, moisture, vapors and strong cleaning agents or solvents can cause damage to the device.
- Disconnect the appliance from the power supply and the connected devices before cleaning.
- Clean the device with a dust-free cloth.
