

DIGITUS® Repartidor Gigabit Ethernet PoE, Industrial, 60 W

DN-651140

EAN 4016032486756

Repartidor POE industrial Calha DIN, 60 W, IEEE802.3at/af

O repartidor PoE DN-651140 divide a saída de energia de 48 VCC em 12 VCC através do cabo Ethernet RJ45. Suporta aplicações PoE em ambientes Gigabit Ethernet. Os módulos cumprem a classificação de potência IEEE 802.3bt e suportam ligações PSE Alternativa A e Alternativa B. A potência máxima de saída pode atingir 51W.

O repartidor PoE DN-651140 separa a tensão transmitida por PoE através do cabo Ethernet RJ45 e fornece uma saída de alimentação de 12 V CC. Suporta aplicações PoE em ambientes Gigabit Ethernet

- Em conformidade com IEEE802.3af, IEEE802.3at, IEEE802.3bt.
- Suporta aplicações PoE em ambientes Gigabit Ethernet.
- O algoritmo de deteção automática permite um consumo de corrente de IEEE802.3at até 51 W
- Divide a potência de entrada de 48VDC transmitida através do cabo Ethernet RJ45 em alimentação eléctrica e transmissão de dados
- Suporta uma vasta gama de tensão de entrada de 36Vdc a 57Vdc.
- Potência máxima de saída até 51W.

- Saída 12VDC/4,25A.
- Paragem térmica.
- Proteção contra curto-circuitos.
- Conversor DC/DC altamente eficiente.
- Ecrãs LED para indicar o consumo de energia.
- Instalação em calha DIN
- Especificação do consumo de energia: DC 50 - 57V / 1,5A
- Dispositivo Consumo de energia (máx.): 5W

Attributes

- DDM Support: no
- Industrial usage: no
- PoE injector: no

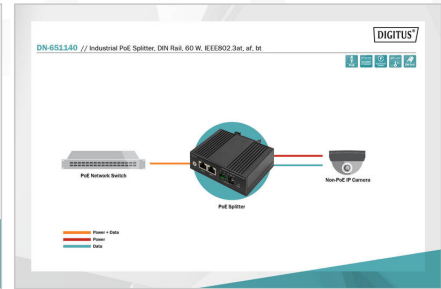

Package contents

- 1x divisor PoE
- 1x manual do utilizador
- 1x cabo de alimentação DC-DC

Logistics

	Number (pcs)	Weight (kg)	Depth (cm)	Width (cm)	Height (cm)	cm ³

Safety notes

- This product is intended for indoor use only.
- Read all instructions and follow all warnings and instructions on the device.
- Do not place this appliance on an unstable surface (such as a trolley, stand, table, etc.).
- Do not use this appliance near water.
- Do not place this appliance near or above a radiator.
- The housing is equipped with openings for heat dissipation and ventilation. To prevent overheating during operation, the ventilation openings must not be blocked or covered.
- Do not place the appliance on a soft surface (e.g. bed, sofa, blanket, etc.). This will block the ventilation.
- The appliance must not be installed in a closed environment if adequate ventilation is not guaranteed.
- Do not spray any liquids onto the appliance.
- Disconnect the mains plug before cleaning. Do not use any liquid or foam cleaners.
- Clean the appliance with a damp cloth.
- Connect the device according to the power supply on the rating plate.
- To prevent damage to the appliance, it is important that all appliances are properly earthed.
- Do not place any objects on the power cable and lay it in such a way as to avoid tripping hazards.
- Use a surge protector, a regulator or an uninterruptible power supply (UPS) to protect your system from sudden, temporary and reduced power.
- Secure the system cable and mains cable properly and ensure that no objects are pressing on the cable.
- Do not insert any objects into the appliance through the openings in the housing. There is a risk of a short circuit, which can lead to fire or electric shock.
- Do not attempt to repair the appliance yourself. Always contact an authorized customer service centre.
- If any of the following conditions occur, unplug the appliance and send it to an authorized service centre for repair
 - The mains cable, power supply unit or plug for the power supply is damaged or worn;
 - Liquid has penetrated the appliance;
 - The device has been exposed to rain or water;
 - The device has been dropped or the housing has been damaged;
 - The function of the device has obviously changed;
 - The appliance cannot be operated as described in the operating instructions.

EU responsible person

EU based economic operator ensuring the product complies with the required regulations.
