

# DIGITUS Fiber optic LC/LC duplex coupler, Multimode-OM4, Keystone module

DN-96019-1-K  
EAN 4016032489825

**Fiber LC-duplex coupler, MM-OM4,for keystone panel Color Violet, incl. keystone frame**

The fiber optic keystone couplers are used to connect two LC fiber optic cables to extend the length of the cable link. Installation is extremely simple with the snap-in technology. They can be easily snap into keystone patch panels or wall plates with standard openings, allowing to run cables through walls and conveniently connect to your fiber optic network.

**The standardized dimensions of adapters makes it suitable for most conventional distributors and wall outlets making it a great solution for bringing fiber to the home and office.**

- Connector Type : LC-LC Duplex

- Polish Type : UPC
- Fiber Mode : Multimode OM4
- Mounting Type : Withouth Flange
- Color : Violet
- Sleeve Material : Ceramic
- Operating Temperature Range : -25 to 70°
- Storage Temperature Range : -25 to 70°
- Weight: 0.005 kg
- Dimensons (L x W x D) : 17 x 22 x 33 mm
- Dimensions (L x W x D) : 17 x 22 x 33 mm

**Package contents**

- LC/LC MM-OM4 Coupler for Keystone Module

Logistics						
	Number (pcs)	Weight (kg)	Depth (cm)	Width (cm)	Height (cm)	cm³
Packaging Unit Carton	1000	7.60	50.00	37.00	27.00	49,950.00
Packaging Unit Inside	500	3.80	35.00	25.00	3.40	2,975.00

**Safety notes**

- Avoid direct contact with light sources: Fiber optic cables, especially those with active light sources such as lasers (e.g. in optical communication systems), can emit dangerous radiation that can damage
- eyes. Take care never to look directly into the light of an optical fiber, even if the light source is invisible to the naked eye.
- When working with fiber optic cables, especially during tests or when working with lasers, protective goggles should always be worn to protect against harmful radiation.
- When plugging and unplugging the cable, only grasp the plug and do not pull directly on the cable.
- Do not kink or crush: Fiber optic cables are sensitive to mechanical stress.
- To protect cables from physical damage, they should be laid in special ducts or with protective materials
- Keep cable connectors clean: Fiber optic cables are sensitive to dust and dirt. Even small particles on the connectors can severely impair the signal quality.
- Cables should not be used in environments with extremely high or very low temperatures. Observe the product information on the maximum operating temperature of the cable
- Check cables regularly for visible damage such as cracks, kinks or signs of wear. Defective cables should be replaced immediately.

**EU responsible person**

EU based economic operator ensuring the product complies with the required regulations.
