

DIGITUS Gigabit Ethernet PoE+ injector, 802.3at, 30 W

DN-95103-3
EAN 4016032500780

Gigabit Ethernet PoE+ Injector, 802.3at Power Pins:4/5(+),7/8(-), 30W

The PoE injector is the ideal solution for expanding your network in locations without a power connection. Fully compatible with the IEEE 802.3af/at standards, it is perfect for power supply and data transmission for PoE-capable devices such as access points (AP), IP cameras, IP telephones or PoE receivers. Thanks to its powerful features, the PoE injector ensures a stable and reliable connection without the need for additional configurations. An elegant design and robust protection mechanisms make it the first choice for demanding applications.

With the PoE Injector, you benefit from a powerful and reliable network extension - wherever power sources are lacking.

- Connections: OUT: 1x 10/100/1000Mbps RJ45, IN: 1x 10/100/1000Mbps RJ45
- PoE standard: IEEE802.3af/at
- Network cable: 10BASE-T: UTP category 3, 5 (up to 100m), 100BASE-TX: UTP category 5, 5e (up to 100m), 1000BASE-T: UTP category 5e, 6 (up to 100m)

- Transmission range up to 100 m - with DN-95129 PoE extender even up to 800 m
- PoE power: Up to 30W
- Input voltage: AC 100-240V 50/60Hz 0.6A max
- LED display: PoE status (green)
- Dimensions: 142 x 60 x 32 mm
- Operating temperature: 0°C to 40°C
- Storage temperature: -40°C to 70°C

Attributes

- Number of ports: 2
- PoE Power budget: 30 W
- PoE standard: IEEE802.3at (PoE+)
- Ethernet speed: Gigabit
- Industrial usage: no

Package contents

- PoE injector
- Quick installation guide
- Mains cable

Logistics						
	Number (pcs)	Weight (kg)	Depth (cm)	Width (cm)	Height (cm)	cm³

Safety notes

- This product is intended for indoor use only.
- Read all instructions and follow all warnings and instructions on the device.
- Do not place this appliance on an unstable surface (such as a trolley, stand, table, etc.).
- Do not use this appliance near water.
- Do not place this appliance near or above a radiator.
- The housing is equipped with openings for heat dissipation and ventilation. To prevent overheating during operation, the ventilation openings must not be blocked or covered.
- Do not place the appliance on a soft surface (e.g. bed, sofa, blanket, etc.). This will block the ventilation.
- The appliance must not be installed in a closed environment if adequate ventilation is not guaranteed.
- Do not spray any liquids onto the appliance.
- Disconnect the mains plug before cleaning. Do not use any liquid or foam cleaners.
- Clean the appliance with a damp cloth.
- Connect the device according to the power supply on the rating plate.
- To prevent damage to the appliance, it is important that all appliances are properly earthed.
- Do not place any objects on the power cable and lay it in such a way as to avoid tripping hazards.
- Use a surge protector, a regulator or an uninterruptible power supply (UPS) to protect your system from sudden, temporary and reduced power.
- Secure the system cable and mains cable properly and ensure that no objects are pressing on the cable.
- Do not insert any objects into the appliance through the openings in the housing. There is a risk of a short circuit, which can lead to fire or electric shock.
- Do not attempt to repair the appliance yourself. Always contact an authorized customer service centre.
- If any of the following conditions occur, unplug the appliance and return it to an authorized service centre for repair
- The mains cable, power supply unit or plug for the power supply is damaged or worn;

- Liquid has penetrated the appliance;
- The device has been exposed to rain or water;
- The device has been dropped or the housing has been damaged;
- The function of the device has obviously changed;
- The appliance cannot be operated as described in the operating instructions.
