FTTH Preterminated cable, Singlemode, 1 Core Blowable, LC-APC to LC-APC, 50 m

The blow-in cable is a specialized fiber optic cable designed for efficient and fast installation using air pressure blow-in technology in microducts. This cable comes with factory pre-terminated polished connectors, eliminating the need for on-site splicing and significantly reducing installation time and potential points of failure. It enables fast and uninterrupted installation of fiber optic connections to homes and businesses. It ensures high-quality, fast and low-latency connections within complex network infrastructures. The cable offers a future-proof solution for modern fiber optic networks by optimally combining efficiency, reliability and scalability. By using pre-terminated, blow-in technology, installers and network operators can significantly reduce installation times while ensuring long-term stable performance in demanding broadband applications.
The pre-assembled, blow-in cable is a lightweight, factory pre-assembled fiber optic cable. It is characterized by high flexibility, low friction and prefabricated connectors, enabling fast and reliable installation without splicing work on site. Ideally suited for fiber-to-the-home (FTTH) applications.

- Product type: Pre-assembled, blow-in FTTH drop cable
- Fiber type: Singlemode ITU-T G.657.A2 (insensitive to bending)
- Number of fibers: 1 fiber
- Outer diameter: 2.8 mm
- Cable length: 50 meters
- Strain relief / reinforcing elements: Aramid yarn (Kevlar)
- Sheath material: PE
- Color: White
- Connector type: LC/APC
- Insertion loss: ≤ 0.3 dB
- Return loss: ≥ 60 dB (APC)
- Minimum bending radius (operation): ≥ 10 mm
- Blow-in capability: Suitable for microducts (3.5 mm internal diameter)
- Operating temperature: -20 °C to +60 °C
- Storage temperature: -40 °C to +70 °C

Package contents

- 1 x FTTH pre-assembled drop cable, blow-in, singlemode, 1 fiber, LC/APC, 50 m

Logistics						
	Number (pcs)	Weight (kg)	Depth (cm)	Width (cm)	Height (cm)	cm³
Packaging Unit Carton	20	7.84	45.00	45.00	25.00	50,625.00
Packaging Unit Inside	5	1.96	21.50	21.50	22.00	10,169.50
Packaging Unit Single	1	0.39	34.00	23.00	3.50	2,737.00
Net single without Packaging	1	0.31	19.00	19.00	3.50	0.00

Safety notes

- Avoid direct contact with light sources: Fiber optic cables, especially those with active light sources such as lasers (e.g. in optical communication systems), can emit dangerous radiation that can damage
- eyes. Take care never to look directly into the light of an optical fiber, even if the light source is invisible to the naked eye.
- When working with fiber optic cables, especially during tests or when working with lasers, protective goggles should always be worn to protect against harmful radiation.
- When plugging and unplugging the cable, only grasp the plug and do not pull directly on the cable.
- Do not kink or crush: Fiber optic cables are sensitive to mechanical stress.
- To protect cables from physical damage, they should be laid in special ducts or with protective materials
- Keep cable connectors clean: Fiber optic cables are sensitive to dust and dirt. Even small particles on the connectors can severely impair the signal quality.
- Cables should not be used in environments with extremely high or very low temperatures. Observe the product information on the maximum operating temperature of the cable
- Check cables regularly for visible damage such as cracks, kinks or signs of wear. Defective cables should be replaced immediately.
