## USB - Type C to HDMI AOC FO Adapter cable HDMI Version 2.0; Max 4Kx2K@60Hz; 15m

This active USB Type-C to HDMI AOC Adapter Cable is ideally suited for transferring uncompressed video and audio data with high bandwidth over longer distances. The hybrid construction, which uses copper and fiber optic cable, prevents electromagnetic interference. This ensures a loss-free transfer along the entire length of the cable with UHD resolution of up to 4K/60Hz and bandwidths of up to 18 Gbps. The use of fiber optic cable keeps the diameter of this active cable very low and gives it a very tight bending radius and low weight. It is ideal for use in homes, meeting rooms, and conference rooms as well as within buildings — and these are just a few of the possible uses. The simple Plug and Play installation is user-friendly; just plug it in and immediately enjoy optimal image quality. The adapter cable is unidirectional (USB Type C = input device, HDMI Type A = output device). It supports numerous standards such as HDMI 2.0, HDMI 1.4, or HDR10. Cutting edge chip technology makes it possible to transfer the full HDMI® signal spectrum while also supporting uncompressed CED and EDID with very low latency. No external power supply required. Meets the DisplayPort 1.2 specification and is compatible with DP Alternate Mode to USB Type C Standard.
