Gigabit Ethernet PoE Splitter, 802.3af/at/bt Output: 12V/4,2A,24V/2,1A, 51W

The PoE splitter supplies data and power via a single Ethernet cable to devices that do not support Power over Ethernet. Simply connect the input of the splitter to a PoE switch or PoE injector and the output side to a non-PoE network device such as an access point, IP phone or camera to provide power and data. The extender is self-powered via PoE, so no additional power supply is required. The output voltage can be regulated to 12V or 24V via a dip switch. This splitter extends your network wherever you want to place network devices for which no sockets are available. □are available.

The PoE splitter delivers data and power of up to 51W to devices via a single Ethernet cable.
