Charging trolley, 15.6", USB-A, UV-C, Data-Synch. 30 charge bases, PDU, fan, 1260 x 824 x 650 mm

The mobile charging cabinet from DIGITUS® is the ideal and compact solution for storing and charging your portable devices such as notebooks and tablets. Mobile charging cabinets are frequently used in public facilities such as schools in order to store devices securely at a central location while charging them at the same time. The cabinet includes 3 rows with 10 charging stations each, all of which have their own USB connection on the front. The devices can also be connected with installed socket strips (3 x 10 safety sockets) at the back. Thanks to ample cable feedthroughs and excess cable storage, optimal cable management is guaranteed. Installed ventilators (3 x 24 V) combined with ventilation slits ensure active cooling of the cabinet. Installed UV-C lamps ensure sterile conditions and thus environmentally friendly, enhanced hygiene. For centralized synchronization of data, a device can be connected to the external USB port.

The ideal solution for sterile storage and charging your portable devices via USB-A connections. Including option for data synchronization.
