Solar Extension cable, 4 sqmm, MC4 connector 3m,4sqmm,halogen-free,UV-res.,flex,IP67,2pcs

This high-quality solar cable for extension with pre-assembled MC4 connectors at both ends has been specially developed for use in photovoltaic systems. With a conductor cross-section of 4 mm², a length of 3 m and a dielectric strength of up to 1500 V DC, it is ideal for connecting solar modules, inverters or other PV components. The cable consists of a tinned copper conductor, which ensures optimum current transmission and reliable corrosion protection. The resistant XLPO insulation and robust PA66 jacket offer excellent protection against UV radiation, moisture, ozone and mechanical stress. Thanks to the pre-assembled MC4 connections, the cable is ready for immediate use and can be installed effortlessly - ideal for DIY solar projects or professional PV installations. With an operating temperature range of -40°C to +85°C, flame-retardant properties (UL94 V-0) and a contact resistance of 0.509⊠, this cable guarantees maximum safety, efficiency and durability - even in demanding weather conditions.

Safe, efficient and ready to use - this solar cable extension with MC4 connections is the perfect plug-and-play solution for all indoor and outdoor photovoltaic projects.
