Safety notes

- Overloading can lead to overheating and damage to the appliance or the connected peripherals.
- If necessary, use an external power supply to ensure stable performance.
- If devices such as external hard disks or printers that require a high power consumption are connected, the device should be used with an external power supply. Otherwise, the device could be overloaded or functional problems could occur.
- Do not expose the device to rain, moisture, vapors or liquids.

-
- Do not insert any objects into the device.
 - Do not attempt to repair the unit or open the housing without authorization. You risk an electric shock!
 - Ensure adequate ventilation to prevent damage due to overheating.
 - Dust, moisture, vapors and strong cleaning agents or solvents can cause damage to the device.
 - Disconnect the appliance from the power supply and the connected devices before cleaning.
 - Clean the device with a dust-free cloth.
