

# DIGITUS Fiber Optic Multimode Patchcord, OM4, LC / LC

DK-2533-02-4  
EAN 4016032308805

**FO patch cord, duplex, LC to LC MM OM4 50/125 µ, 2 m**  
FO patch cord, duplex, LC to LC,MM OM4 50/125 µ, 2 m  
**Future-oriented standards and high-end quality for your network.**

- Duplex cable
- LSOH
- Connector with ceramic ferrule
- Cable diameter 2 mm
- Single packed with test-report
- Color: RAL 4003

- Attributes**
- Assortment: Fiber Optic Patch Cables
  - Cable diameter: 2 mm
  - Color cable: erika violet
  - Connector 1: LC
  - Connector 2: LC
  - Fiber class: OM4
  - Fiber diameter: 50/125µ
  - Mode: Multimode
  - Length: 2 m

**Safety notes**

- Avoid direct contact with light sources: Fiber optic cables, especially those with active light sources such as lasers (e.g. in optical communication systems), can emit dangerous radiation that can damage
- eyes. Take care never to look directly into the light of an optical fiber, even if the light source is invisible to the naked eye.
- When working with fiber optic cables, especially during tests or when working with lasers, protective goggles should always be worn to protect against harmful radiation.
- When plugging and unplugging the cable, only grasp the plug and do not pull directly on the cable.
- Do not kink or crush: Fiber optic cables are sensitive to mechanical stress.
- To protect cables from physical damage, they should be laid in special ducts or with protective materials
- Keep cable connectors clean: Fiber optic cables are sensitive to dust and dirt. Even small particles on the connectors can severely impair the signal quality.
- Cables should not be used in environments with extremely high or very low temperatures. Observe the product information on the maximum operating temperature of the cable
- Check cables regularly for visible damage such as cracks, kinks or signs of wear. Defective cables should be replaced immediately.

**EU responsible person**

EU based economic operator ensuring the product complies with the required regulations.
