

10/100 Mbps Network USB Adapter

DN-10050-1
EAN 4016032315285

USB 2.0 to Fast Ethernet Adapter, 1 RJ 45, USB-A Male, 10/100MBIT,

With our USB 2.0 to fast Ethernet adapter you are able to use the full speed of your fast Ethernet network without having to open your PC and add an internal network adapter. You can connect your device to the internet or to a printer, transfer files, join multiplayer games and much more. Nowadays Ultrabooks™, subnotebooks, Macbooks Air, etc. have no Ethernet ports anymore, our adapter solves this problem. Due to his low power consumption of 170 mA, the adapter can be used even with a Macbook Pro and Macbook Air without problems.

Expands Ultrabooks, Netbooks, Notebooks, PCs, Macbooks Pro and Macbooks Air to an RJ-45 network connection

- 10/100 Mbps speed supported on LAN connector
- Ethernet IEEE 802.3 and 802.3u (10Base-T, 100Base-TX) compatible, with auto negotiation

- Auto-MDI(X) capable (straight and cross network cable auto-detection)
- Supports USB 2.0 full speed and high speed (USB bus powered)
- AX88772C chipset
- Low power consumption, only 170 mA
- 1 x RJ-45 port, 1x USB A plug
- USB bus powered, plug and play (Windows)
- Suitable for all common network environments
- Operating temperature: 0 °C - 70 °C
- Operating humidity: 25% - 65% RH (non-condensing)
- Supports Windows 10, 8.1, 8, 7, Vista, XP, Mac OS X and Linux

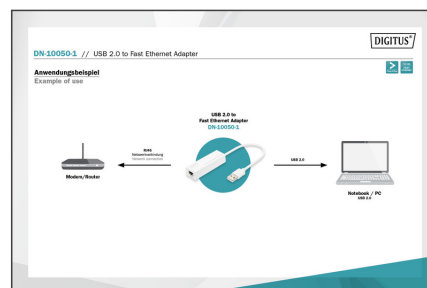

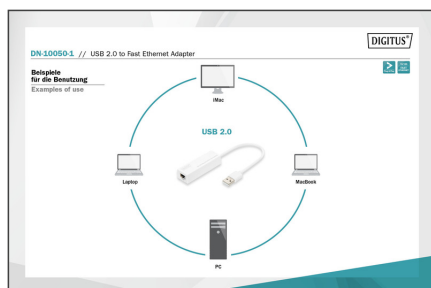

Package contents

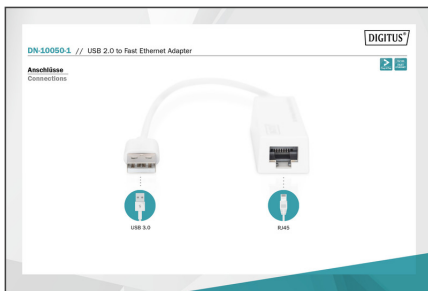

- 10/100M Network USB Adapter
- Quick installation guide
- Support CD-ROM

Safety notes

- Overloading can lead to overheating and damage to the appliance or the connected peripherals.
- If necessary, use an external power supply to ensure stable performance.
- If devices such as external hard disks or printers that require a high power consumption are connected, the device should be used with an external power supply. Otherwise, the device could be overloaded or functional problems could occur.
- Do not expose the device to rain, moisture, vapors or liquids.
- Do not insert any objects into the device.
- Do not attempt to repair the unit or open the housing without authorization. You risk an electric shock!
- Ensure adequate ventilation to prevent damage due to overheating.
- Dust, moisture, vapors and strong cleaning agents or solvents can cause damage to the device.
- Disconnect the appliance from the power supply and the connected devices before cleaning.
- Clean the device with a dust-free cloth.
