

Stereo Multimedia Headset

DA-12201
EAN 4016032320876

Stereo Multimedia Headset, with microphone Cable length 1,8m, with volume control

With the DIGITUS stereo multimedia headset your gaming experience gets a new level. Thanks to the good manufacturing ear pads that provide a comfortable fit and get rid of ambient effects and noises, the sound of various games, videos and music sounds nice and ensures hours of sound pleasures. The microphone transmits voice commands clearly to other team members and is also ideal for recording. You can also use the headset as a normal earphone.

Safety notes

- Make sure that the cable is not subjected to too much strain or damaged, as this can lead to short circuits or other technical problems. Avoid pulling or twisting the cable.
- Do not expose the device to rain, moisture, vapors or liquids.
- Avoid using the device near sources of strong electromagnetic interference (such as cell phones or large appliances).
- Do not attempt to repair the unit or open the housing without authorization.
- Dust, moisture, vapors and strong cleaning agents or solvents can cause damage to the device.
- Clean the device with a dust-free cloth.
- For headsets:
 - To avoid hearing damage, ensure that the volume is kept at a safe level. Very high volume levels can lead to permanent hearing loss.
 - Do not wear the headset for too long at a time to avoid skin irritation or heat build-up.
 - Protect your headset from moisture and rain. Many headsets are not waterproof and could be damaged by moisture.
 - If you experience pain, pressure or dizziness after wearing the headset for a long time, please stop using it immediately and consult a doctor if necessary.
- Make sure that the headset is compatible with the device you are using and is connected correctly to avoid technical faults or damage.
- For microphones:
 - Make sure that the microphone is correctly aligned and not positioned too close to your mouth or other sound sources to avoid unnecessary noise or clipping.
 - Make sure that the volume of the microphone in an environment with loudspeakers is set so that there is no feedback. This can lead to unpleasant noises and damage the microphone or speakers.
