

DIGITUS® USB 2.0 serial adapter

DA-70167

EAN 4016032456308

USB 2.0 to serial Converter, DSUB 9M incl. USB A Cable 80cm

The DIGITUS® USB 2.0 serial adapter is a practical solution for serial connectivity. RS232 serial interfaces are no longer available on new hardware, so the DIGITUS® USB 2.0 serial adapter enables data exchange between a computer USB 2.0 port and peripheral devices with serial interfaces (COM port, RS232). These include, for example, weather stations, sensors, machine control systems, set-top boxes, gaming consoles, PDAs, scanners, modems, ISDN adapters and many other peripheral devices. The USB 2.0 serial adapter is downwardly compatible with USB 1.1 and enables adaptable baud rates of between 75 and 128,000 bits per second. The customizable PL2303GT chipset is compatible with all common operating systems and also supports power management and remote wake up. A separate power supply is not required, because the device is powered through the USB connection.

Provides a serial RS232 interface via USB 2.0

- Provides a serial RS232 interface via USB 2.0
- Meets the USB 2.0 standard

- Downward compatibility with USB 1.1
- Adaptable data transfer rates of between 75 and 128,000 bits per second.
- Supports remote wake up and power management
- Chipset: PL2303GT
- Customizable with the PL2303GT chipset
- 1x RS232 plug (Sub D 9-pole) / 1x USB A plug
- Interface: Full duplex
- Gilded contacts
- Incl. USB extension cable, approx. 80 cm
- Supports Windows 10, 8.1, 8, 7, Vista, XP, Mac OS X and Linux
- True 3.3V CMOS drive output and TTL input

Package contents

- USB serial adapter
- USB extension cable
- Driver CD

Safety notes

- Switch off the computer completely and disconnect it from the power supply before installing or removing the network card.
- Static discharge can damage the product or the PC. Take measures against static discharge (ESD) when installing the product, e.g. wear an antistatic wrist strap.
- Before installation, touch the metal surface of the PC housing or another grounded object to ground any ESD charge via the housing.
- Avoid using too much force when connecting the product to the PC.
- Please ensure that any cables are connected correctly without overstretching or damaging them.
- Avoid touching the contacts of the product with your fingers to prevent corrosion or static charge.

EU responsible person

EU based economic operator ensuring the product complies with the required regulations.
