

Mobile Workstation with Integrated Network Cabinet

DN-39004

EAN 4016032460831

16U network cabinet, mobile workstation, IP20 1678x600x670 mm, storage, screen box, grey

The mobile workstation with integrated network cabinet from DIGITUS® was primarily designed for flexible usage in, for example, office environments, warehouses, hospitals, laboratories, hotels or conference rooms. Each cabinet is divided into three parts. The lockable monitor unit is used for storage of a monitor or similar device. It can also be fitted with 482.6 mm (19") components. A lockable keyboard box guarantees secure storage of your input devices when these are not in use. Cable holes on both sides mean that connected devices can be used even when the box is locked. The basis of the mobile workstation is formed by the 482.6 mm (19") cabinet, which comes fitted with two shelves (fixed and removable). They can be used, for example, to store a printer or similar device. In addition to this, every mobile workstation is also equipped with a folding table for efficient everyday usage. Each cabinet is made of up to 1.5 mm thick sheet steel, and special sheet metal bending technology ensures that the robust steel construction is very robust. Coloring is done with powder coating in the color gray (RAL 7035). An impact-resistant yellow frame protects the cabinet from damage. The extensive range of accessories for the cable wiring, shelves etc. helps it fulfill many different requirements for daily use.

Combines a 482.6 mm (19") network cabinet with a mobile workstation for flexible usage.

- Front door made of side metal struts with safety glass.
- 482.6 mm (19") profile rails mounted inside the cabinet, galvanized
