

DIGITUS USB-C™ Docking Station 10-in-1 with Keyboard

DA-70885

EAN 4016032464471

USB-C Dock (10 Port) + Keyboard (GER), HDMI, VGA, 3x USB 3.0, 2x card reader, 2x USB-C, RJ45, Audio

The multifunctional DIGITUS® docking station has everything you need to create a fully equipped workplace. The integrated keyboard enables you to utilize your notebook or MacBook even more conveniently, namely in conjunction with the docking station. Via the HDMI® and VGA port, you can extend your desktop by 2 additional monitors or connect projectors / TV devices. In combination with your existing screen, this allows you to clone your desktop or extend it to a maximum of 3 displays (Windows: 3 extended / macOS: 2 extended + 1 cloned). Additionally, the docking station is equipped with two USB-C™ ports, one of which features Power Delivery (PD). This allows you to charge your connected notebook / tablet while in use. Three additional USB 3.0 ports provide you with plenty of space to connect additional mobile devices, which can be charged while in use. Of course, other USB peripheral devices, e.g. a mouse or USB stick can also be connected using the USB 3.0 port (downward compatible with USB 2.0). Two card readers for SD/TF cards and MicroSD cards are also integrated, as is a gigabit Ethernet port. This allows you to connect your notebook to the local network or Internet via the docking station using a network cable. The Desktop-Multi-Tool features are rounded off with a stereo audio jack. This allows you to use a microphone, speaker, or headset. With the multifunctional DIGITUS® docking station and integrated keyboard, you can expand your notebook's, MacBook's or PC's capabilities.

Docking station with an integrated keyboard (QWERTZ) - extends your MacBook® or notebook by 10 additional connections

- 1 x USB-C™ connection: USB 3.1 (Gen 2) 10 Gbps SuperSpeed+
