

DIGITUS Active Ergonomic Footrest with Rocker Function

DA-90412
EAN 4016032474982

Active Foot Rest, 10kg max, black

Stay moving! By regularly activating your legs, you stimulate the circulation, which can counteract joint wear and muscular tension. Two rocker functions are available, fast and slow movements, as well as for use as a raised footrest. Ideal for professions where you spend most of your time at work in a seated position – a perfect ergonomic addition to promote health.

Active foot movements promote circulation and joint mobility

Safety notes

- Seating furniture:
- Make sure to adjust the seat according to your body size and sitting habits.
- Do not subject the office chair to excessive loads. Make sure that the chair is not designed for more weight than recommended by the manufacturer.
- Regularly check that the seat is in good mechanical condition. Look out for loose screws, cracks in the material or other defects. These could increase the risk of unsafe use.
- Do not lean back. To reduce the risk of falling, do not rock the chair any further than vertically.
- Not suitable for children.
- Do not use the seat if you are standing with only one foot or none at all on the floor.
- Footrests
- Ensure that the footrest is stable and positioned on a flat surface. It should be positioned so that the feet can be placed comfortably on it without the support slipping or tipping.
- Make sure that the footrest is positioned at the correct height so that you can place your feet comfortably and at a natural angle. Incorrect positioning could lead to unnecessary strain on the legs and lower back.
- Make sure that the footrest is not placed in an area where others could easily trip over it.
- Only use the footrest for your feet and not as a support for heavy or sharp objects. Improper use could damage the footrest and pose a danger to you or others.
- Clean the footrest regularly.
