10" Gigabit 16-Port Unmanaged PoE+ Switch (120W)

DN-95334
EAN 4016032508625

10 inch 16-Port Gigabit Unmanaged PoE+ Switch, 120 W

The DIGITUS® DN-95334 is the ideal solution for large PoE installations where many devices—such as IP cameras, access points, VoIP phones, or IoT modules—are operated simultaneously. With 16 Gigabit PoE+ ports (30 W per port) and a total PoE budget of 120 W, it offers high device density and sufficient power reserves for demanding projects. The 32 Gbps backplane delivers stable bandwidth for all connected PoE clients. The fanless metal housing ensures reliable, silent continuous operation—even under heavy load. Its compact 10-inch form factor makes it ideal for equipment cabinets, floor distribution panels, and wall installations in hotels, office complexes, warehouses, or residential complexes.

Reliably powers up to 16 PoE devices in a single compact 10-inch unit—ideal for CCTV, Wi-Fi, and IoT.

- Network & Performance
- 16 × 10/100/1000 Mbps RJ45 (PoE+)
- PoE Standards: IEEE 802.3af/at, 30 W per port
- 120 W total PoE budget
- Backplane: 32 Gbps
- Forwarding Rate: 23.8 Mpps
- MAC Table: 8K
- Design & Installation
- Completely fanless
- Metal housing
- 10-inch rack-mount
- Dimensions: approx. 252 × 150 × 44 mm, Weight: approx. 2.5 kg
- Electrical Systems & Surroundings
- Internal power supply, 100–240 V AC
- Max. Power Consumption: 135 W
- Operating temperature: 0–40 °C; storage temperature: –10–70 °C
- Humidity: 5–95%, non-condensing

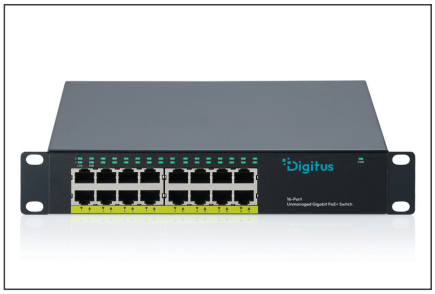

Attributes

- Number of ports: 16
- PoE Power budget: 120 W
- PoE standard: IEEE802.3at (PoE+)
- Ethernet speed: Gigabit
- Industrial usage: no
- Installation type: 10 inch, Desktop
- Managed: no
- Outdoorsuitable: no
- PoE (Power over Ethernet): yes
- Protection against vanadlism: no
- VLAN: yes

Package contents

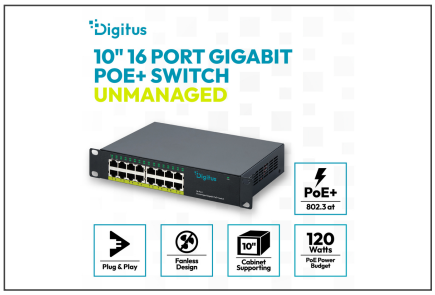

- DN-95334 Switch
- Power cable
- Quick Start Guide
- Rubber feet

Safety notes

- This product is intended for indoor use only.
- Read all instructions and follow all warnings and instructions on the device.
- Do not place this appliance on an unstable surface (such as a trolley, stand, table, etc.).
- Do not use this appliance near water.
- Do not place this appliance near or above a radiator.
- The housing is equipped with openings for heat dissipation and ventilation. To prevent overheating during operation, the ventilation openings must not be blocked or covered.
- Do not place the appliance on a soft surface (e.g. bed, sofa, blanket, etc.). This will block the ventilation.
- The appliance must not be installed in a closed environment if adequate ventilation is not guaranteed.
- Do not spray any liquids onto the appliance.
- Disconnect the mains plug before cleaning. Do not use any liquid or foam cleaners.
- Clean the appliance with a damp cloth.
- Connect the device according to the power supply on the rating plate.
- To prevent damage to the appliance, it is important that all appliances are properly earthed.
- Do not place any objects on the power cable and lay it in such a way as to avoid tripping hazards.
- Use a surge protector, a regulator or an uninterruptible power supply (UPS) to protect your system from sudden, temporary and reduced power.
- Secure the system cable and mains cable properly and ensure that no objects are pressing on the cable.
- Do not insert any objects into the appliance through the openings in the housing. There is a risk of a short circuit, which can lead to fire or electric shock.
- Do not attempt to repair the appliance yourself. Always contact an authorized customer service centre.
- If any of the following conditions occur, unplug the appliance and send it to an authorized service centre for repair
- The mains cable, power supply unit or plug for the power supply is damaged or worn;
- Liquid has penetrated the appliance;
- The device has been exposed to rain or water;
- The device has been dropped or the housing has been damaged;
- The function of the device has obviously changed;
- The appliance cannot be operated as described in the operating instructions.
