4K HDMI Extender Splitter Set, 1x4, 70m HDMI Loop Out, PoC, EDID

The DIGITUS® HDMI Extender Splitter Set extends an AV signal from the source device over a distance of up to 70 m and distributes it onto 4 screens in UHD resolution (4K/60Hz). Supports CAT 6/7/8 cables. Thanks to PoC, only the transmitter unit needs to be supplied with power by an external power adapter. EDID management, ARC, R232 signal transmission, HDMI loop-out and IR signal transfer are also included as features.

Safety notes

- If the device is powered by a plug-in power supply, ensure that the power adapter is connected correctly and meets the specified requirements (e.g. voltage and current).
- Only use certified CAT5e or CAT6 cables to ensure stable signal transmission.
- For particularly long cable runs or in environments prone to interference, it is recommended to use shielded network cables.
- Make sure that all connections are tight and secure to avoid loose contacts that could affect the signal quality. Make sure that the HDMI and Ethernet connections are connected correctly.
- Make sure that the CAT cable is not laid near high-voltage power lines or other strong sources of electromagnetic interference to avoid signal interference.
- Only operate the device within the specified temperature range.
- Do not use the device outdoors or in damp or wet environments
- Check all connections and cables regularly for wear or damage. Cables and connections can wear out, especially with frequent use or long installations, which can lead to poor signal quality or system failure.
