

ednet .smart home alarm signal for indoor use

84295
EAN 4054007842954

ednet.smart home alarm signal for indoor use built-in battery with 8 hours standby, 110dBm

You can also receive an audio alert if something happens in your home. You can connect motion sensors or contact sensors to the inside areas using the ednet.smarthome Alarm Signal and receive an audio alert if the sensor detects a status change. Now you can sleep peacefully while ednet.smarthome components keep watch over your home. You use the app to set up individual rules that allow your home to be monitored while you are away. Find out right away if the front door or kitchen window is opened, or a movement is detected in the living room. This will give you the greatest possible sense of security. You can configure the settings very easily with the ednet.smarthome app. You can set up a connection to your network and all other components using the ednet.smarthome Starter Kit. Integrate and connect as many devices in your home as you like and make it that much smarter.
