

DIGITUS USB 3.0 Gigabit SFP Network Adapter

DN-3026
EAN 4016032457138

USB3.0 Gigabit SFP Network Adapter additional SFP module needed

The USB 3.0 Gigabit SFP adapter allows you to extend your laptop to an SFP connection and to connect directly to a fiber optic network via a suitable fiber optic transceiver. This fiber optic interface is the right choice both for mobile use in connection with laptops and for stationary use in desktop systems. In addition, this SFP adapter in data and server centers serves its purpose in monitoring and troubleshooting applications, allowing you to intervene into the fiber optic infrastructure directly and with full bandwidth. It is easy to use, offers a wealth of options and is the perfect complement for most computers that do not have an SFP connection as a standard feature. Thanks to the virtual drive, no driver installation from CD is necessary

- plug in and get started. The power supply is also ensured via the USB 3.0 interface. If Wi-Fi connections pose a security risk and copper connections are too slow, fiber optic connectivity provides the right solution for your network. The adapter is compatible with Windows, macOS, Google Chrome and all other systems that are compatible with USB 3.0.

Extend your laptop with USB 3.0 port to a complete Gigabit SFP network connection.

- Gewicht: 50 g
- Package contents**
 - 1 x bedieningshandleiding
