Gigabit Ethernet PoE Switch 4-port PoE + 1-port uplink, 62W PoE budget

The DIGITUS 5-Port Gigabit Desktop Switch with four Power over Ethernet ports and one additional uplink Port, offers your network significant improvement in terms of performance and efficiency. Thanks to PoE support, you only need a single (network) cable for power and data transfer. This switch makes it much easier to connect devices such as access points, network cameras, and IP telephones, and requires far less cabling than alternatives. It also allows you to extend your network in places where there are no power supply cables or sockets available. The switch does not require any configuration and therefore guarantees quick and seamless integration into the network. Moreover, the switch's fanless design ensures soundless operation, which makes this device the perfect solution for office environments and meeting rooms.
