ednet smart home Starter Kit Security

84337
EAN 4054007843371

ednet voice controlled HD Starter Kit Security includes 1x HD720p indoor camera, 1x motion sensor

A comprehensive security solution with voice control via Amazon Alexa and Google Assistant in a package - the ednet smart home Starter Kit Security. In this starter set you receive an HD camera, a motion detector and two contact sensors for doors and windows. The high-resolution camera is the central gateway to the system, via which all components as well as separately available alarm sirens and power sockets for indoor and outdoor areas can be integrated. The live camera image can also be called up on the Alexa Echo Show or Echo Spot using voice commands; optional accessories like power sockets for indoor and outdoor areas can be controlled using Google Assistant or Amazon Alexa (ednet Alexa Skill or ednet Google Action). The system sends you push notifications to your smartphone, no matter where you are, about recorded movements or sensor status changes. Find out whether doors and windows are opened and closed while you're out and about, or whether there is movement in the camera or sensor area. This means that you always know if someone enters your home, and can even call up the live image on your smartphone using the ednet smart home app. Specific rules can also be assigned for the components, for example a time window for alarm activation or partial alarm activation of sensors for every day of the week, or dependencies such as the switching on of a power socket or sirens when a sensor is triggered. Installation of the system in your wireless LAN is simple and intuitive using the auto configuration mode. Easily integrate as many devices as you want into your house, making it smarter and more secure.

Feel safe around the clock with the Starter Kit Security from ednet. Now in the new version with voice control via Amazon Alexa and Google Assistant!*

- Mobile surveillance and access using the app for iOS and Android
- Connection via ednet Alexa Skill and ednet Google Action possible
- HD camera for indoor areas: Resolution 1280 x 720p
